Kandana, Sri Lanka

PROFILE

Software Engineer and AI Engineering professional with hands-on experience building **full-stack web applications, AI-powered solutions, and digital government platforms** using the modern **JavaScript ecosystem (React.js, Node.js, Express.js)**, Python, and modern software engineering practices. Experienced in contributing to **government digital transformation projects**, including enterprise workflow systems, document management platforms, visa application solutions, and public-sector website modernization. Skilled in **RESTful API development, database design, AI/ML integration, intelligent automation, and scalable application architecture**. Strong problem-solving and technical leadership capabilities, with experience coordinating teams and delivering secure, scalable, and impactful technology solutions. Passionate about combining **software engineering and applied AI** to solve complex real-world problems.

WORK EXPERIENCE

Software Engineer (Internship)

2026- PRESENT

Ministry Of Digital Economy - Sri Lanka

- **Full-Stack Development:** Engineered scalable digital government solutions (MoDE Digital Workplace, Cooperate Visa Application Portal, Ministry website) using React.js, Node.js, REST APIs, and SQL Server.
- **Project Leadership:** Led the ICTA National Fuel QR Pass Project, mentoring a 12-member technical team and delivering critical project milestones.
- **IT Support:** Resolved software issues and performed routine hardware maintenance to ensure system reliability and uninterrupted daily operations.

ICT Teacher

2023 - 2025

Self-Employed

- Mentored students in ICT and programming, delivering practical projects in Java, Python, HTML, CSS, and JavaScript to strengthen technical skills.

EDUCATION

BSc (Hons) Computer Science with Applied Artificial Intelligence

2023 - Present

School of Computing | Coventry University London

Current GPA : 3.82 / 4.00

BSc (Hons) in Health Information and Communication Technology

2022 - On Hold

School of Computing| GWUIM| University of Kelaniya

Year 1 GPA: 3.45 / 4.00

Advanced Diploma in Software Engineering

2022 - 2024

School of Computing | National Institute Of Business Management

GPA: 3.64 / 4.00

Assured Diploma in Information Technology

2020 - 2021

School of Computing | Esoft Metro Campus

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript (ES6+), C#, SQL, PHP, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Node.js, Express.js, ASP.NET, Spring Boot, React Native
- **Databases:** MySQL, SQL Lite, PostgreSQL, Firebase, MongoDB
- **Cloud & DevOps:** Lanka Government Cloud (LGC), Microsoft Azure, Oracle Cloud Infrastructure, Docker, Git, GitHub,
- **Artificial Intelligence:** Machine Learning, XGBoost, Pandas, NumPy, AI Automation, Predictive Analytics
- **Enterprise & Integration:** Apache NiFi, REST API Integration, JSON, XML
- **Tools:** Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio, Postman, Figma
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, MVC Architecture, Agile/Scrum, Debugging, Performance Optimization

PROJECTS

MINISTRY OF DIGITAL ECONOMY WEBSITE REVAMP - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- Redesigned and developed the Ministry’s legacy website into a modern, responsive platform using React, Tailwind CSS, and Node.js.
- Integrated an AI-powered chatbot to provide intelligent assistance and improve citizen access to ministry information.
- Tech Stack: React.js (Vite), Tailwind CSS, Node.js (Express)

CORPORATE VISA APPLICATION SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- Developed a secure corporate visa management platform with applicant registration, application processing, approval workflows, and document management.
- Tech Stack: React.js (Vite), Node.js (Express), TanStack Query, i18next, bcryptjs, jsPDF

MODE DIGITAL WORKPLACE- ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- Built an enterprise document and task management system featuring secure file management, workflow automation, reporting, and role-based access control.
- Tech Stack: React.js (Vite), Node.js (Express), ExcelJS, PDFKit, MySQL, bcryptjs

PIZZA MANIA - ASSOCIATED WITH NIBM

- Developed a mobile food ordering application with user authentication, real-time order management, Google Maps integration, and Firebase services.
- Tech Stack: Java, Android Studio, SQLite, Firebase, Google Maps API, REST APIs

INTELLIGENT FOREX MARKET ANALYSIS SYSTEM

- Developed an AI-powered market analysis platform using machine learning, technical indicators, MT5 market data, and financial news to generate trading insights.
- Tech Stack: Python, MetaTrader 5 (MT5), XGBoost, Finnhub API, NewsAPI, Google Gemini API

VERTIX - ASSOCIATED WITH NIBM

- Developed a desktop business management system with inventory management, sales reporting, user authentication, and SQL Server database integration.
- Tech Stack: C#, .NET Framework, Microsoft SQL Server, Crystal Reports
