

KISANDU WETHMAL

SOFTWARE ENGINEERING (APPLIED AI) UNDERGRADUATE

 [Portfolio - kisanduwethmal.me](https://kisanduwethmal.me)

 [Github - Wethmal](#)

 [LinkedIn - Kisandu Wethmal](#)

 Kandana, Sri Lanka

PROFILE

Innovative Software Engineering & Applied AI Undergraduate with hands-on experience building scalable web and mobile ecosystems. Proficient in Full-Stack development (React, Node.js, Spring Boot, PHP) and specialized in integrating Machine Learning models into real-world applications. Proven track record of architecting end-to-end solutions—from RESTful microservices and MySQL databases to AI-powered predictive systems and Computer Vision tools. Passionate about leveraging ML and Data Science to build smarter, more efficient SaaS products and automated software solutions. A collaborative Agile team player dedicated to writing clean, maintainable code that solves complex problems.

SKILLS

- **Programming Languages:** Python, Java, C#, JavaScript, HTML, SQL,, PHP
- **Web Technologies:** React.js, Node.js, Spring Boot
- **Mobile Technologies:** React Native
- **Databases:** MySQL, MS SQL, PostgreSQL, Firebase, MongoDB
- **UI Design** – Figma
- **Tools:** Git, Postman, Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio
- **Soft & Transferable Skills:** Problem solving, Task & priority management, Teamwork & collaboration, Communication, Research & learning ability

EDUCATION

BSc (Hons) in Software Engineering School of Computing Coventry University London Current GPA : 3.82 / 4.00	2023 - Present
BSc (Hons) in Health Information and Communication Technology School of Computing GWUIM University of Kelaniya Year 1 GPA: 3.45 / 4.00	2022 - On Hold
Advanced Diploma in Software Engineering School of Computing National Institute Of Business Management GPA: 3.64 / 4.00	2022 - 2024
Assured Diploma in Information Technology School of Computing Esoft Metro Campus GPA: 3.50 / 4.00	2020 - 2021

WORK EXPERIENCE

Software Engineer (Internship)

Ministry Of Digital Economy

2026- PRESENT

- Full-Stack & AI Development: Built scalable applications using React and Spring Boot, integrating AI-driven automation to optimize government digital services. Developed communication, mentoring, and problem-solving skills, transferable to software development roles.
- Systems Architecture: Developed secure RESTful APIs and MySQL databases to support mission-critical ICT infrastructure for public sector use.

ICT Teacher

Self-Employed

2023 - 2025

- Provided ICT theory and programming lessons to school students, creating personalized exercises and mini-projects.
- Developed communication, mentoring, and problem-solving skills, transferable to software development roles.

PROJECTS

Corporate Visa Application (Sri Lanka) - Associated With MINISTRY OF DIGITAL ECONOMY

Reactjs (Vite) - TanStack - i18next - jsPDF - Node.js (Express) - bcryptjs

DOCUMENT & TASK MANAGEMENT SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

Reactjs (Vite) - ExcelJS - Node.js (Express) - bcryptjs - PDFKit

Pizza Mania - Associated with NIBM

Android Studio (Java) — SQLite — Maps API — Firebase — REST APIs

SafeRoute AI - Associated with NIBM

React Native - FireBase - Weather Api - Googlemap Api

Vertex - Associated with NIBM

C# - .NET - Crystal Reports - Microsoft SQL

INTERESTS

- Software Engineering & Cloud Computing
- Full-Stack Web & Mobile Development
- Artificial Intelligence & Machine Learning (Applied AI)
- Computer Vision & Predictive Analytics
- UI/UX Design & Human-Computer Interaction
- SaaS Product Development & Entrepreneurship
- Database Architecture & Secure API Design
