LinkedIn - [Kisandu Wethmal](https://www.linkedin.com/in/kisandu-wethmal)

Kandana, Sri Lanka

PROFILE

Software Engineer with hands-on expertise in architecting scalable full-stack web and mobile applications using the modern JavaScript ecosystem (React, Node.js, React Native). Experienced in delivering secure, enterprise-grade platforms and independently building innovative SaaS solutions. Highly skilled in integrating applied AI and custom automations, leveraging Python to develop algorithmic prediction models, automated workflows, and data pipelines. Passionate about clean software architecture and solving complex technical challenges.

SKILLS

- **Programming Languages:** Python, Java, C#, JavaScript, HTML, SQL,, PHP
- **Web Technologies:** React.js, Node.js, Spring Boot
- **Mobile Technologies:** React Native
- **Databases:** MySQL, MS SQL, PostgreSQL, Firebase, MongoDB
- **UI Design** – Figma
- **Tools:** Git, Postman, Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio
- **Soft & Transferable Skills:** Problem solving, Task & priority management, Teamwork & collaboration, Communication, Research & learning ability

EDUCATION

BSc (Hons) in Software Engineering School of Computing Coventry University London Current GPA : 3.82 / 4.00	2023 - Present
BSc (Hons) in Health Information and Communication Technology School of Computing GWUIM University of Kelaniya Year 1 GPA: 3.45 / 4.00	2022 - On Hold
Advanced Diploma in Software Engineering School of Computing National Institute Of Business Management GPA: 3.64 / 4.00	2022 - 2024
Assured Diploma in Information Technology School of Computing Esoft Metro Campus GPA: 3.50 / 4.00	2020 - 2021

WORK EXPERIENCE

Software Engineer (Internship)

Ministry Of Digital Economy - Sri Lanka

2026- PRESENT

- Developed secure, scalable full-stack applications using React.js, Node.js, ASP.NET, and SQL to support Sri Lanka's national digital transformation initiatives. Engineered high-performance RESTful APIs, optimized enterprise databases, and delivered cloud-based government solutions on the Lanka Government Cloud (LGC), improving the efficiency, reliability, and accessibility of digital public services.

ICT Teacher

Self-Employed

2023 - 2025

- Taught ICT and programming concepts using hands-on coding exercises and real-world projects, helping students build strong technical foundations. Developed learning resources, guided practical software development activities, and enhanced communication, leadership, and analytical problem-solving skills through effective mentoring and classroom management.

PROJECTS

CORPORATE VISA APPLICATION SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- A corporate visa application system built with Vite and Node.js where Applicants apply visa applications and admins manage and approve applications.
- Tech Stack: React.js (Vite), TanStack Query, i18next, Node.js (Express), jsPDF, bcryptjs

DOCUMENT & TASK MANAGEMENT SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- Built a centralized document and task management platform with secure file handling, workflow automation, and reporting.
- Tech Stack: React.js (Vite), Node.js (Express), ExcelJS, PDFKit, bcryptjs

PIZZA MANIA - ASSOCIATED WITH NIBM

- Developed a mobile food ordering application with authentication, real-time order management, maps, and cloud integration.
- Tech Stack: Java, Android Studio, SQLite, Firebase, Google Maps API, REST APIs

INTELLIGENT FOREX MARKET ANALYSIS SYSTEM

- An AI-powered Forex market analysis system built with Python and MetaTrader 5 (MT5) that analyzes historical market data, technical indicators, and financial news to predict market trends.
- Tech Stack: Python, MetaTrader 5 (MT5), XGBoost, NewsAPI, Finnhub API, Google Gemini API

VERTIX - ASSOCIATED WITH NIBM

- Developed a desktop business management system featuring inventory management, reporting, and secure database integration.
- Tech Stack: C#, .NET Framework, Microsoft SQL Server, Crystal Reports
