 Kandana, Sri Lanka

PROFILE

Innovative Software Engineering (Applied AI) Undergraduate passionate about AI transformation, intelligent automation, and building scalable software solutions. Experienced in Full-Stack development using React, Spring Boot, Node.js, and modern software architectures while integrating Machine Learning, Computer Vision, and predictive analytics into real-world applications. Currently contributing to digital transformation initiatives at the Ministry of Digital Economy by developing secure, AI-powered government solutions. Committed to innovation, clean architecture, continuous learning, and creating impactful SaaS products that solve complex business and public-sector challenges.

SKILLS

- **Programming Languages:** Python, Java, C#, JavaScript, HTML, SQL,, PHP
- **Web Technologies:** React.js, Node.js, Spring Boot
- **Mobile Technologies:** React Native
- **Databases:** MySQL, MS SQL, PostgreSQL, Firebase, MongoDB
- **UI Design** – Figma
- **Tools:** Git, Postman, Visual Studio, Visual Studio Code, IntelliJ IDEA, Android Studio
- **Soft & Transferable Skills:** Problem solving, Task & priority management, Teamwork & collaboration, Communication, Research & learning ability

EDUCATION

BSc (Hons) in Software Engineering School of Computing Coventry University London Current GPA : 3.82 / 4.00	2023 - Present
BSc (Hons) in Health Information and Communication Technology School of Computing GWUIM University of Kelaniya Year 1 GPA: 3.45 / 4.00	2022 - On Hold
Advanced Diploma in Software Engineering School of Computing National Institute Of Business Management GPA: 3.64 / 4.00	2022 - 2024
Assured Diploma in Information Technology School of Computing Esoft Metro Campus GPA: 3.50 / 4.00	2020 - 2021

WORK EXPERIENCE

Software Engineer (Internship)

Ministry Of Digital Economy - Sri Lanka

2026- PRESENT

- Developed secure, scalable full-stack applications using React.js, Node.js, ASP.NET, and SQL to support Sri Lanka's national digital transformation initiatives. Engineered high-performance RESTful APIs, optimized enterprise databases, and delivered cloud-based government solutions on the Lanka Government Cloud (LGC), improving the efficiency, reliability, and accessibility of digital public services.

ICT Teacher

Self-Employed

2023 - 2025

- Taught ICT and programming concepts using hands-on coding exercises and real-world projects, helping students build strong technical foundations. Developed learning resources, guided practical software development activities, and enhanced communication, leadership, and analytical problem-solving skills through effective mentoring and classroom management.

PROJECTS

CORPORATE VISA APPLICATION SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- A corporate visa application system built with Vite and Node.js where Applicants apply visa applications and admins manage and approve applications.
- Tech Stack: React.js (Vite), TanStack Query, i18next, Node.js (Express), jsPDF, bcryptjs

DOCUMENT & TASK MANAGEMENT SYSTEM - ASSOCIATED WITH MINISTRY OF DIGITAL ECONOMY

- Built a centralized document and task management platform with secure file handling, workflow automation, and reporting.
- Tech Stack: React.js (Vite), Node.js (Express), ExcelJS, PDFKit, bcryptjs

PIZZA MANIA - ASSOCIATED WITH NIBM

- Developed a mobile food ordering application with authentication, real-time order management, maps, and cloud integration.
- Tech Stack: Java, Android Studio, SQLite, Firebase, Google Maps API, REST APIs

SAFEROUTE AI - ASSOCIATED WITH NIBM

- Built an AI-powered navigation application that recommends safer travel routes using weather and geolocation intelligence.
- Tech Stack: React Native, Firebase, Google Maps API, Weather API

VERTIX - ASSOCIATED WITH NIBM

- Developed a desktop business management system featuring inventory management, reporting, and secure database integration.
- Tech Stack: C#, .NET Framework, Microsoft SQL Server, Crystal Reports
